

Load Balancing

Ultimate reliability for your website

Ensure that your website always stays online with our Load Balancing technology. Your website will be hosted on multiple servers for even greater reliability and performance.

✓ **Optimised Website Performance**

By seamlessly sharing visitors over multiple web servers, Load Balancing helps to improve the reliability and speed of your website.

✓ **Maximum Uptime**

Your website stays online even if one web server is temporarily unavailable - the site will be served by other web servers.

✓ **Ideal For High-Traffic Websites**

If you're expecting to receive a large number of visitors, Load Balancing is the ideal solution to share the load.

How Load Balancing Works:

Your website visitors

Multiple servers providing your website content for ultimate reliability
